WARNING: FLYING FOXES

Competitors in horse events at the show should be aware of the flying fox colony at the Glebe Lagoon, south of the showground. They are close to the showgrounds where many competitors camp.

Flying foxes are known to carry Hendra Virus which can affect horses, dogs and humans. The virus is carried to the other

species through body fluids of the flying fox ie: faeces, saliva and urine. However, testing has shown that no Hendra Virus has been found in coastal NSW colonies (including those in the Bega Valley). It is confined to Queensland and the Northern Rivers of NSW.

Horse owners camped at the Showground for the show should take precautions however, such as general hygiene, covering of feed and water vessels used by horses, especially at nighttime when the flying foxes are more active. Campers are advised to refrain from having any animals under or near the trees near the lagoon where the flying foxes roost.
